Summary

Aspiring Full Stack Developer currently pursuing 4th year in IT, with practical experience in developing web applications using React.js, Node.js, and JavaScript. Proficient in HTML, CSS, API development, and basic Java programming. Passionate about creating efficient, user-friendly applications and seeking an opportunity to enhance skills in a professional environment.

Skills

- Programming Languages: C, Java, JavaScript
- Frontend Development: HTML5, CSS3, JavaScript, React.js, Redux, Responsive Web Design, Bootstrap
- Backend Development: Node.js, Express.js, RESTful APIs, Authentication & Authorization (JWT)
- Database Management: MongoDB, MySQL, SQL
- Software Development Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)
- Version Control & Collaboration: Git, GitHub, GitHub Actions
- Web & Full-Stack Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), API Development, JSON, Postman
- Developer Tools: Visual Studio Code, Postman

Courses

Full Stack Development Course, SkyWin IT Academy

09/2024 – 04/2025

Projects

Full-Stack Authentication System | React, Node.js, Express.js, MongoDB, JWT, bcrypt

- Built a complete MERN-based authentication system that allows users to create an account, log in securely, and access a protected profile dashboard.
- Developed RESTful backend APIs for signup, login, logout, profile fetching, token refresh, and project ZIP file upload using Node.js and Express.js.
- Secured user authentication with JWT access tokens, refresh tokens stored in HTTP-only cookies, protected backend routes, and bcrypt password hashing.
- Designed a MongoDB user schema to store user details, hashed passwords, and refresh tokens with persistent database integration using Mongoose.
- Improved user experience with form validation messages, clean navigation between login/signup pages, and a mobile-friendly UI.

Perfume E-Commerce Website | React, HTML, CSS, JavaScript

- Developed a responsive e-commerce perfume store interface using React with product sections, promotional banners, navigation menus, and footer content.
- Designed a modern shopping homepage with featured products, new arrivals, discount offers, blog previews, brand showcase, and customer service highlights.
- Implemented reusable UI sections such as product cards, category navigation, sale banners, newsletter subscription, and contact information blocks.
- Created a clean and visually appealing retail-style layout focused on product discovery, user engagement, and online shopping experience.

ExpenseIQ - Personal Expense Tracker | React, JavaScript, CSS, Context API

- Developed a responsive personal finance dashboard that allows users to track income, expenses, total balance, and recent transactions.
- Built authentication screens with signup and login forms, password confirmation, password visibility toggle, validation messages, and protected user flow.
- Implemented transaction management features including add, edit, delete, search, filter by type/category, and sort by title, date, or amount.
- Created analytics views with spending-by-category donut chart, monthly income vs expense bar chart, and top expense breakdown.
- Used React Context API to manage authentication state, transaction data, categories, and calculated financial statistics across the application.
- Designed a clean dashboard UI with reusable cards, tables, modals, icons, empty states, and responsive layouts for better user experience.

Education

Bachelor of Technology in Information Technology,
Sarvajani College Of Engineering & Technology
